WORK HISTORY

FRONT END DEVELOPER / UI DESIGNER

ONTOTEXT

JULY 2016 - PRESENT

Here at ontotext i am part of GraphDB team which in short provide tools to manage and operate with rdf database more info here:<http://graphdb.ontotext.com/>. More specific i am responsible of app which is based on angular. This app with it's API provides to the user useful features and helps him to manage his datasets. My main responsibilities are optimizing those feature if it's needed and integrate new one. This includes writing new modules with their templates, controllers, css visualizations, e2e tests and etc.

FRONT END DEVELOPER

MUSALA SOFT - MUSALA SOFT IS A LEADING BULGARIAN SOFTWARE ENGINEERING SERVICES COMPANY.

NOV 2014 - JULY 2016

I am Front-End Web Developer who is motivated to combine the art of design with the art of programming. My responsibilities are to translation of the UI/UX design wireframes to actual code that will produce visual elements of the application. I am working closely with UI/UX designer and bridge the gap between graphical design and technical implementation, taking an active role on both sides and defining how the application looks as well as how it works.

Developing responsive web designs that are suitable for a modern web accessed via many different types and sizes of device, such as TVs, mobile phones, tablets, and desktop computers

I believe the best design comes from establishing problems specific to a project then solving them in the simplest way possible. I design to achieve the aims of the project and also providing users with a quality experience during their interaction with the product.

SKILLS

HTML5

- HTML5, written by hand using well thought out semantics
